INSTRUMENTATION ENGINEERS

ELECTRONIC ENGINEER

Several openings are immediately available for graduate engineers in the following areas:

- **ELECTRONIC INSTRUMENTATION DESIGN**—Components for use in control consoles
- **ELECTRONIC INSTRUMENTATION REPAIR**—Direct group maintaining instruments; should know semiconductors, recorders, electronic circuitry and preferably vehicle emissions analyzers
- **COMPUTER SYSTEMS**—Key position available for design and implementation of data acquisition, data reduction and processing systems; must know use of digital computers and all lines of peripheral equipment
- **MECHANICAL INSTRUMENTATION**—Design and development of state-of-the-art force, velocity and acceleration transducers

Send resume with salary requirements to:

An Equal Opportunity Employer

3M COMPANY

INSTRUMENTATION & CONTROL ENGINEER

Due to continued expansion of our manufacturing facilities our Engineering Division has positions open in the following areas:

ELECTRICAL ENGINEER

Work involves design and development of DC drive systems, electronic instrumentation, analysis, design and fabrication of control systems. We prefer BSEE degree with 2 to 7 years experience in electronic control systems.

CHEMICAL ENGINEER

Responsibilities include systems analysis and designing of instrumentation for chemical process equipment. We prefer a BS or MS degree in chemical engineering with 2 to 7 years experience in process instrumentation and control. Candidate must be proficient in control systems design including simulation techniques.

Location of positions is St. Paul, Minnesota. Salary commensurate with experience. Outstanding employee benefits. For confidential consideration, send your resume to:
